 **Upload Students**

NOTE: The import template is very particular with the formatting and text. Please do not change the column headers or location on the spread sheet.

For example: If you will not collecting “Parents Names”, it must remain on the import template in the same order.

The image shows the Microsoft Excel ribbon with the 'HOME' tab selected. The ribbon includes sections for Clipboard (Cut, Copy, Paste, Format Painter), Font (Font face, size, bold, italic, underline, color, background color), Alignment (Wrap Text, Merge & Center), Number (General, Currency, Percentage, Decimals, Thousands Separator), Conditional Formatting, Format as Table, Styles (Normal_Sheet1, Normal, Bad, Good, Neutral, Calculation), Cells (Insert, Delete, Format), and Editing (AutoSum, Fill, Clear, Sort & Filter, Select). Below the ribbon, the formula bar shows 'Y16'. The spreadsheet grid displays data for rows 1 through 5, with columns A through P. The data includes student information such as Last Name, Middle Initial, First Name, Birth Date, Gender, Year, Student Id, Email, Address, City, State, Zipcode, Country, Home Phone, Parents Names, and GPA.

	A	B	C	D	E	F	G	H	I	J	K	L	M	N	O	P
1	Last Name	Middle Initial	First Name	Birth Date	Gender	Year	Student Id	Email	Address	City	State	Zipcode	Country	Home Phone	Parents Names	GPA

NOTES: If you are copying/pasting data from another document, please make sure that the cells do not have any additional formatting.

1. Please check for “erroneous” characters within the cells.

Check cells to make sure there are no equal signs “=” or quotations “” signs in the cells. We have found that some systems place these items in cells after copy and pasting.

The example below show the cell contains the student Last Name, but the actual formula tool bar shows the extra formatting, **which must be deleted before importing.**

The screenshot shows the Microsoft Excel interface. The ribbon includes FILE, HOME, INSERT, PAGE LAYOUT, and FORMULAS. The HOME tab is active, showing options for Clipboard (Paste, Copy, Format Painter) and Font (Calibri, size 11, Bold, Italic, Underline, Color, Background Color). The formula bar shows the text "Abdelhameed" in a yellow box, with a red arrow pointing to it from the first instruction. Below the formula bar is a table with columns A, B, and C. Row 2 is highlighted, showing "Abdelhameed" in column A, "em" in column B, and "Youssef" in column C.

	A	B	C
1	Last Name	Middle Initial	First Name
2	Abdelhameed	em	Youssef
3	Abraham	Elizabeth	Maceon
4	Abrahamsen	Allen	Blake
5	Acosta Andrade	Jose	Efrain

1. Check student names for “extra” characters. For example, if a student name contains an ['] apostrophe, these characters must be removed to upload your data successful.
2. **TIP: Use the “Find and Replace” function within your template editor to remove these characters “in mass” when developing your template.**
