KEEP THEM HYDRATED, KEEP THEM SAFE

5 TIPS TO HELP ATHLETES STAY HYDRATED

1. **KEEP HYDRATION TOP OF MIND**
   - Remind athletes to check their urine color before practice. If it’s the color of pale lemonade, that’s a sign of being hydrated.
   - Take weather into account and give athletes opportunities to drink during practice.
   - Teach athletes to pay attention to how they feel, including their thirst and energy levels.

2. **KEEP FLUID LEVELS UP**
   - Athletes should drink enough fluid to maintain hydration without over-drinking.
   - Flavored, cold, lightly salted sports drinks like Gatorade® Thirst Quencher are important because sodium helps maintain the athlete’s desire to drink and retain the fluid consumed.

3. **KEEP THE BODY COOL**
   - Remind athletes to drink cool fluids to help maintain their body temperature.
   - If your athletes experience heat illness, help them lower their body temperature by lying in a cool place with their legs elevated, applying cool, wet towels to their body and drinking cool fluids.

4. **KEEP HYDRATED BEFORE, DURING AND AFTER ACTIVITY**
   - Athletes need to think about their entire athletic schedule when it comes to fueling (not just when they are competing).
   - Encourage them to drink plenty of fluids throughout the day to replace the fluids lost through sweat.

5. **KEEP A RECOVERY SCHEDULE**
   - Rest and recovery are an essential part of avoiding heat illness.
   - Ensure your athletes have time for breaks during practices.
   - Encourage athletes to get 6-8 hours of sleep each night in a cool environment if possible.
